ABSTRACT OF THE DISCLOSURE

The invention is a method, a computer readable medium, and a system for automated form completion for a user of a computer. In this regard, the method comprises the steps of identifying one or more fields in a form and automatically supplying information corresponding to the one or more identified fields without intervention by the user. The computer readable medium is capable of being embedded with a computer software configured to perform the above mentioned method. The system comprises a field identifier module capable of identifying one or more fields in a form and a field completer module capable of supplying information corresponding to the one or more identified fields without intervention by the user.
